DocsCorp service, support and software continue to impress Am Law 100 firm Cozen O'Connor

Philadelphia, PA —May 11, 2010 —DocsCorp, a global leader in integrated document management and workflow solutions, today announced that Cozen O'Connor, a leading Am Law 100 firm with 24 offices on two continents, has selected pdfDocs compareDocs as the firm's standard for document comparison and review.

"The migration to pdfDocs compareDocs is the final piece in the pdfDocs Solutions Suite that we began using 2 years ago," says Amy Freese, Director of Information Services at Cozen O'Connor. "As part of our new desktop project, we took the opportunity to test and evaluate all the major document comparison technologies."

"We ran side-by-side tests, with the help of some of our users, and compareDocs not only met but exceeded our expectations for document comparison. Integration into Open Text eDOCS DM (formerly Hummingbird) and our existing pdfDocs Desktop was seamless, requiring no special connectors or plug-ins," said Amy. "Our existing implementation of pdfDocs Desktop consists of 1200 copies distributed firm wide. The quality service and support that DocsCorp has been providing our firm was another significant factor toward making the decision to choose compareDocs," concluded Amy.

"The continued adoption of the pdfDocs solutions by Cozen O'Connor underscores the quality of the product and the fact that there is now a credible alternative to both Adobe and Workshare," says DocsCorp President of Sales and Marketing, David Woolstencroft. The pdfDocs Solutions Suite is a natural for the legal market and I look forward to expanding our relationship with Cozen O'Connor to further develop our range of pdfDocs products to enhance and support legal workflow."

DocsCorp partner EIM International worked closely with Cozen O'Connor during every step of the process. Debra Parrish, EIM Executive Director said, "we are very happy to have been an integral part of the process and this is yet more proof that the pdfDocs Solutions Suite is far superior to anything else in the market today."

Document comparison with a difference

The compareDocs approach to document comparison and workflow is unique. Its leading-edge technology identifies changes in documents (Word to Word, PDF to PDF, Word to PDF) and outputs the changes directly to Word or PDF so that you can continue to work on the document. With Word to Word comparisons, for example, the new document becomes your next version of the compared documents – a live working Word document. The result is a seamless, integrated workflow that delivers unprecedented levels of accuracy and efficiency—no more proprietary viewing technology; no more reformatting comparison documents; no more time wasted!

The pdfDocs Solutions Suite

The pdfDocs Solutions Suite is designed specifically for law firms and for legal workflow. It integrates into core legal applications (MS Office), processes and systems (Autonomy iManage WorkSite, NetDocuments, Open Text eDOCS DM, Worldox) to deliver higher levels of efficiency, productivity and security for law firms at a cost that is significantly less than any other solution.

The pdfDocs Solutions Suite provides law firms with PDF creation, collation, annotation, redaction, form filling, OCR, file splitting, bates numbering, document binding and comparison capability.
